

AI Tool Prompt Engineering Report

DAVID JOHN C. GABAYAN

Bachelor of Arts in Interdisciplinary Studies
Minor in Media and Technology

April 2026

Name of AI tool: Recraft V4

Domain: Image Generation

Why I chose it: I want to have a studio some day and having a logo is essential.

Original Prompt :

Make me a logo of a production studio. This studio covers film, original soundtrack creation, giving your story to be made into film, basically things a regular studio would.

The studio values excellence, respects author's creative freedom, and believes that when a story has potential, it cultivates it. When a story is lacking, it guides it.

The name of the studio is DG studio

Outputs:

AI Assisted Prompt:

LLM: ChatGpt

 Enhanced Prompt

****Objective:****

Design a professional and visually striking logo for a creative production company.

****Studio Name:****

****DG Studio****

****About the Studio:****

DG Studio is a full-service production company that specializes in:

- * Film production**
- * Original soundtrack (OST) creation**
- * Story development and adaptation (transforming ideas into films)**

It operates like a modern, high-quality film studio that nurtures storytelling from concept to final production.

****Core Values to Reflect in the Design:****

- * **Excellence** – high standards, cinematic quality, professionalism**
- * **Creative Freedom** – respect for authors and originality**
- * **Growth & Guidance** – nurturing strong ideas and refining weaker ones**

****Design Direction:****

- * Style: Cinematic, modern, elegant, and professional**
- * Tone: Inspiring, creative, and visionary**
- * Color Palette: Dark tones (black, navy, deep purple) with accents of gold, white, or silver**
- * Typography: Clean, bold, and premium-looking (sans-serif or cinematic serif fonts)**

****Visual Elements (Optional but Recommended):****

- * Film-related icons (film reel, camera, clapperboard)**
- * Sound/music elements (waveforms, notes, subtle audio lines)**
- * Abstract storytelling symbols (light, spark, growth, transformation)**

****Composition Guidelines:****

- * The logo should be simple yet memorable
- * Must look good in both full color and monochrome
- * Should be scalable (usable for social media, posters, film credits, etc.)
- * Include both icon + text version and a text-only version

****Overall Feel:****

A logo that represents a studio that doesn't just produce films—but ****discovers, develops, and elevates stories into cinematic experiences****.

Comparison and Analysis

The first result without the enhancement of Chat GPT, the result was decent, it was not ugly. Little unique but not my preference. The Color scheme of orange and black somehow does not fit well. The other result, the dark blue was kind of alright. Compared to the initial output, the enhanced prompt output was a little better. I really like the result on the left. Color scheme of gold and dark blue looks cool and the logo kind of symbolizes the letter D and G. The output on the right of the enhanced prompt is not as appealing. It is unique but kind of generic, the symbol is hard to make something out of. Although it literally is a tape, its hard to really symbolize it to anything.

All in all, the enhanced prompt is better than the initial prompt. As I observed chat GPT enhances the prompt by giving more details so that the AI is able to create it exactly or close to how you want it. Lacking details in prompting would mean that the AI has the decision how to make the output which in most cases, would not be what you want. One can also prompt into any LLM to ask what details are needed to further enhance the prompt, that when you answer the asked details, the LLM AI would turn it into a prompt-ready text, which would further enhance the final output. Here I also learned that AI should not replace work, but augment it, assist in it while we build the foundation.
